

# DIY Video Production Resources Compiled 8/13

There are many sites that offer services this list can get you started compiling what you need to produce your own video.

Carefully reading and understanding the terms of use from each site is important. All images, footage and audio are copyrighted. Even current musical performances of compositions in the "public domain" are "owned" by some entity, though there are performances in the public domain which can be used without copyright infringement.

Freebies: Many web based editing/ video creating platforms have free trials and or free versions. They also tend to have paid versions with more features.

free online video editing:

Royalty free does not mean "free" of cost. A royalty is a small sum paid for each "play" of the content. Example - radio stations pay per play. For some commercial use of music a license is obtained, allowing a one time payment for use of content in a derivative work for specified terms.
